

OPENVERSE & BITGOLD

Layer0 Infrastructure for Making Blockchains Interoperable

Reserve 100 BTG for each family member

Because it is a complementary realization of the Bitcoin theory

Version	2024.04.25
Department	Openverse Global
Author	Elio

Industry Frameworks

Layer 0

Global Infrastructure

Openverse

Openverse is a Layer0 hub network based on blockchain technology. It is based on the existing blockchain technology and proposes the concept of "fully open protocol cross-chain". It will realize "the transmission of value (token/NFT/message) between different blockchains, metaverses and the traditional Internet is as simple as sending email".

Layer 1

Popular blockchains

Layer 2

Application blockchains

OPENVERSE Program Highlights

Technical Highlights

- Main network has been online in 2024.04.20 (Bitcoin 5th halving day)
- Positioned in the Layer0
- **Protocol type cross-chain (non-cross-chain bridge)**
- TPS: 300,000 + (actual test results)
- Block cycle : 380 milliseconds (seconds to the account, actual test results)
- Gas fee: can be omitted from the calculation

Protocol Highlights: New Protocol Classes and Decentralized Value Exchange Marketplace

- Common Tokens VRC20/721 VS Pancake
- Bitcurrency VRC10 VS Forex Marketplace
- Privcurrency VRC11 VS USDTs
- Bitsecurity VRC12 VS Stock Marketplace
- OpenSwap Four Decentralized Exchanges

Bitgold - Allocate

Bitgold total supply

According to 2023 data provided by the World Gold Council, 208874 tons of gold have been mined globally since human civilization[<https://www.gold.org/about-gold/gold-supply/gold-mining/how-much-gold>](208874000 kilograms, an increase of approximately 3000 tons per year). From a mathematical perspective, we have taken a number of the same size and set the total number of BTGs issued to 200 million, which is constant. All developers should prioritize the movement of decimal points and never consider changes in numerical values.

Bitgold DPOS Rewards

BTG holders who participate in DPOS pledge protection for inter chain security will receive BTG rewards. The total production limit of DPOS is 100 million BTGs, gradually decreasing.

Bitgold distribution(M)

■ Civilian institutions ■ Founder team ■ Foundation
■ Sovereign state ■ Staking reward

10 million: founding team, with a linear release of 20 years after the main network is launched for 10 years;

20 million: Utopia Foundation, released linearly over 20 years after 10 years of main network launch;

30 million: Private institutions, including capital, media, and ordinary individuals, IDO will be immediately released;

40 million: Sovereign state reserves, with each sovereign state holding 1 million, to be released immediately upon accession;

100 million: Long term pledge income for approximately 30 years.

IDO and IPO Program

We launched the IDO in May 2024 to start the program of building public nodes. We will allocate 30 million Bitgold pieces to 30 nodes, 1 million pieces per node. We ask for your support, you can donate digital assets, we use Bitgold in return. The Bitgold you get can be immediately put into the decentralized wallet to get more Bitgold

First period 2.05 USD

Second period 2.10 USD

Third period 2.15 USD

N Period $2.00 + 0.05 \cdot N$ USD

30th period 3.50 USD

Then go live on the exchanges: Binance, OKEX, and open the market at 5 USD.
